Jon Bowne is the Network Administrator for the City of Fairbanks. He has held this management position for the past five years and is responsible for the security and administration of the city's information infrastructure. Prior to this, he was a technician for Alaska Communications Systems (ACS) for over twenty-five years during which time he was exposed to all aspects of the telecommunications industry. Mr. Bowne is a graduate of both the University of Alaska Fairbanks (UAF) Information Technology Specialist Program and the International Brotherhood of Electrical Workers (IBEW) Telecommunications Apprenticeship Program.

He currently holds number of Information Technology and Information Security certifications, including Certified Information Systems Security Professional (CISSP), Microsoft Certified Systems Engineer (MSCE) with a specialty in security, CompTIA A+, Network +, and Security +. He is a member of The International Association of Computer Investigative Specialists, FBI Infragard, and the International Information Systems Security Certification Consortium - an international information security education and certification organization.
